

Information and Communication Technologies and Migration

A. Reyla and A. Montes

4 December 2015

Presentation Outline

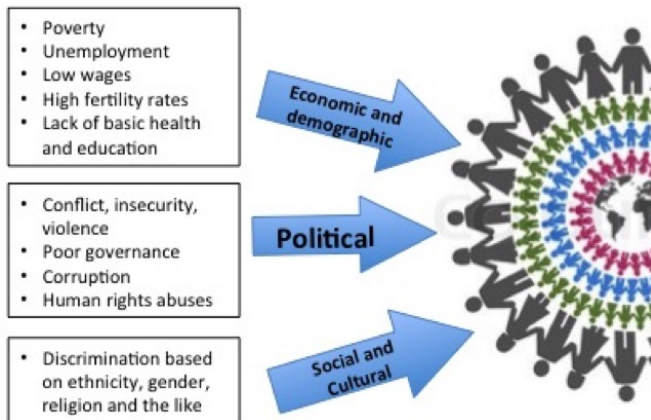

- Research Question
- Theoretical Framework
- Methodology
- Descriptive Statistics
- Results
- Conclusion & Limitations

Research Question & Motivation

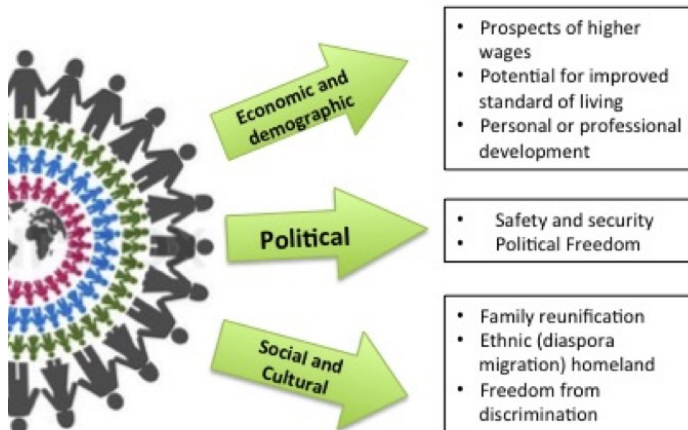

Research Questions? Has the increase use of technologies, such as the Internet and mobile phones affected the flows of emigration?

- Computer mediated communication has created new possibilities for migrants to maintain strong linkages and ties with their home nations (Hiller, 2004)

Theoretical Framework: Push Factors

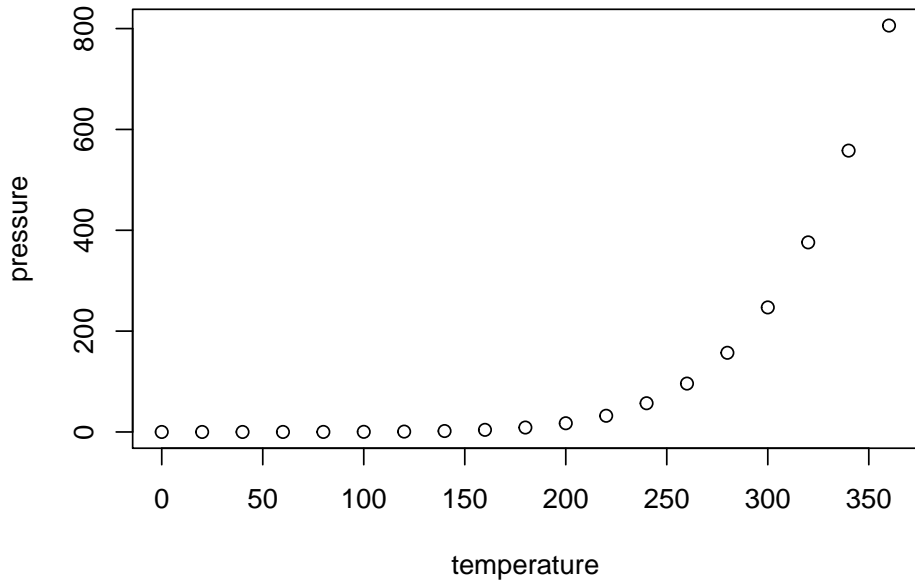

Theoretical Framework: Pull Factors

Descriptive Statistics
